Vedant Dhadge

Ahilyanagar, Maharashtra, India | P: +91 9322260485 | dhadgevedant@gmail.com | Linkedin | Github

Final-year B.Tech Computer Engineering Student with interest in Full-stack, Automation and Genrative AI-driven solutions. Focused on solving user and system problems with reliable, scalable engineering.

Internship Experience

SARTTHI | Software Development Intern — Ahilyanagar, Maharashtra | May-Jul 2026

- Assisting in the development of frontend and backend features for the Sartthi-CA, Sartthi-Sales platform.
- Worked as part of a development team to successfully deliver projects while managing support and issue resolution for **3 client accounts**.

VISTARA | Web Development Intern — Kpg, Maharashtra | Oct-Dec 2025

- Developed a new live programming lab examination module, providing a leetcode-like environment for conducting lab exam
- Implemented multiple **anti-cheating mechanisms** and **AI-based answer analysis** to detect unfair practices

Core Competencies

- **Backend Development** - Python, Fast API, Express
- **Frontend Development** - React
- **Databases**: MongoDB, MySQL, PostgreSQL
- **AI & Automation**: Generative AI, Ollama, RAG, AI Agents, Playwright, Web Scraping

Education

Bachelor of Technology Computer Engineering	Sanjivani College of Engineering	CGPA: 8.2/10.0	Expected 2027
HSC	Maharashtra ACS College	Percentage: 67%	2023
SSC	Sacred Heart Convent High School	Percentage: 85%	2021

Projects

Concert Ticketing Website (3000+ Users Handled | MERN Stack) 2.Details — Mar 2024

- Designed, developed and hosted a full-stack ticketing platform supporting **3000+ concurrent users**
- Implemented ticket booking, category selection, **secure payments** and **refund workflows**

Handwritten Assignment Generator & Printer (Python | PIL) - 3.GitHub — Jan 2016

- Built a Python-based tool that converts digital text into realistic handwritten output. Replicates human handwriting errors, random letter tilt, and inconsistencies to create an authentic handwritten appearance.
- Includes printing tools that align output to user-selected page layouts for direct printing on ruled pages further adding to an handwritten illusion

LocalAI (MERN Stack | Ollama) - 4.GitHub | 5.Documentation

- Built a local AI system running a large language model entirely on a private network, focusing on offline AI automation, data privacy and system-level integration. Developed a web interface and integrated the system with voice assistants.
- The chatbot specifically is integrated with Apple Siri to provide locally processed AI responses.

Invoice AI (Python | Streamlit | OpenCV | OCR | Ollama) 6.Invoice AI Github

- Developed an AI-powered invoice analysis application that extracts text and identifies invoice fields using OCR and OpenCV-based bounding box detection
- Integrated a LLM through for contextual invoice chat, automatic categorization, and invoice history management, providing an end-to-end intelligent document processing workflow.

Achievements and Activities

Winner - Technoxian World Cup — 2025

- Integrated the Drone Delivery website and drone solution won the **Technoxian World Cup** under the category Theme bot.

On Campus Google Developer Group Lead - 7.Details — 2023-24

- Led a college-level developer community with students from multiple academic branches. Gained leadership and organization experience while coordination technical events and sessions
